

World Psychiatric Association Webinar Series

Up-date on Vascular Cognitive Impairment and Lewy Body Dementia

Wednesday 4th May 2022, 2 PM (Central European Summer Time)

Duration 90 minutes

Organised By

Prof Afzal Javed
President
World Psychiatric Association

Prof E Mohan Das
Member, WPA Standing Committee
on Ethics and Review

Major-neurocognitive disorders can present a challenge to clinicians both from a diagnostic point of view and in its management. The many variations in its presentations and also aetiology, necessitate a good understanding of conditions that are less likely to be diagnosed.

While there are diagnostic criteria, many patients have symptoms that are hard to categorize and Lewy Body and Vascular Dementias can pose a particular challenge.

With our rapidly aging population, COVID and the rising cost of investigations, there are key clinical symptoms of which one needs to be aware. This course will cover issues around accurate diagnosis of these two commonly encountered clinical presentations of Dementias.

Our Faculties are:

Prof Ramalingam Chithiramohan,
Consultant Psychiatrist and former Deputy Medical Director and Director of Governance and Service Effectiveness at the Birmingham and Solihull Mental Health NHS Foundation Trust (UK)

Dr Shabbir Amanullah, Chief of Psychiatry at Woodstock General Hospital and President of the Canadian Academy of Geriatric Psychiatry. (Canada)

Programme:

Wednesday 4th May 2022, 2 PM Central European Summer Time
